Ok, thanks. Also, could you check your sites list, and see if you still have the Arkwood (AR) site for CI. Looks like we are going to be revisiting the cleanup, public etc.

Hi, Donn...Nothing on removal sites (TO 035) beyond the monthly financial reporting we are required to do by the contract. On TO 008, I am helping Bill with a fact sheet and mailing list for Madisonville Creosote Works and Steve Harper with a fact sheet (completed last month) and an upcoming community meeting for the R&H Oil Site. I'll probably have a draft of the CIP for Tar Creek ready for review in the beginning or mid-October. I put that on the back burner a bit while other stuff was going on. Things were pretty busy in July/August with all the Proposed Plan stuff underway. I figure things will ease up quite a bit in October and on to the end of the year.
